Downingtown, Pennsylvania 19335

September 27, 1972

Department of Health  
Sanitary Engineering  
326 North Walnut Street  
West Chester, Penna. 19380

ATTENTION: Mr. Richard A. Casson

Dear Mr. Casson:

SUBJECT: William Dick Lagoons

We received a copy of your letter dated September 20, 1972 as written to Mr. William Dick.

On his behalf, we would like to inform you that Mr. Dick purchased one bushel of perennial rye-grass on Saturday, Sept. 23, 1972. This seed will be planted following the next rain.

May we point out it maytake several years for any vegetation to grow on this unfertile land. Inasmuch as this land has been so disturbed little if any moisture remains in the soil to maintain vegetation. Also we had 25 days without rain during the hottest period of our past summer.

I believe Mr. William Dick has fulfilled every sensible obligation and should receive a full release of any further inspections or requests from your agency.

Very truly yours,

CHEMICAL LEAMAN TANK LINES, INC.
